#### SETTING THE STANDARD

The only Granite tile plant in South Africa, the Graniti Tecnica production process is just as sophisticated as the name suggests. It is home to the latest Breton technology which includes specialised machinery for calibrating, bevelling, polishing and chamfering.

Setting a new standard in quality and efficiency, the tile line is equipped with 15 polishing heads and utilises imported abrasives.

The Tiles are produced in a number of sizes, the most popular formats being: 400x400, 450x450 and 500x500 - and our monthly production is 4000 square metres of granite.

#### FINISHES

Various formats are available on request, as well as different finishes such as:

- Polished
- Leather
- Flamed
- Honed
- Bush-Hammered
- Brushed
